CA5L3	**MINI PROJECT**	**Credits : 6**

Lab Hours : - Internal assessment : 50 Marks

———————————————————————————————————————

       The Mini Project is not only a part of the coursework, but also a mechanism to demonstrate your abilities and specialization. It provides the opportunity for you to demonstrate originality, teamwork, inspiration, planning and organization in a software project, and to put into practice some of the techniques you have been taught throughout the previous courses. The Mini Project is important for a number of reasons. It provides students with:

- Opportunity to specialize in specific areas of computer science;
- Future employers will most likely ask you about your project at interview;
- Opportunity to demonstrate a wide range of skills and knowledge learned, and encourages integration of knowledge gained in the previous course units.
