

3/3 MCA Second Semester

CA6T1

SEMINAR

Credits : 6

Lab Hours : -

Internal assessment : 50 Marks

External assessment : 100 Marks

A seminar is, generally, a form of academic instruction. It has the function of bringing together small groups for recurring meetings, focusing each time on some particular subject, in which everyone present is requested to actively participate. Normally, participants must not be beginners in the field under discussion. The idea behind the seminar system is to familiarize students more extensively with the methodology of their chosen subject and also to allow them to interact with examples of the practical problems that always occur during research work. It is essentially a place where assigned readings are discussed, questions can be raised and debates can be conducted. It is relatively informal, at least compared to the lecture system of academic instruction.
