CALL FOR PAPERS

Special Session on “Applications of computing in Interdisciplinary Domains”

Session Chair(s): Dr. Suma V

Prof. Dr. Suma V

Dean, Research and Industry Incubation Centre

Professor, Department of Information Science and Engineering

Dayananda Sagar College of Engineering

Theme of Session:

Software computing has laid its foundation in all forms of industry and in all domains of applications. Developing a customer satisfied product is one of the main challenges faced by every domain of application. However, with automation and significance of software in state of the art technology, products with interdisciplinary domains have become one of the most eminent aspects of development. The main aim of this special session on “Applications of computing in Interdisciplinary Domains” is to initiate innovative ideas involving software computation in order to engineer high quality customer satisfied end products. This conference therefore provides an open platform for all academicians, researchers and industry to put forth their innovative ideas and work, which involves software component enabling developing customer satisfied applications.

Topics of Interest:

We invite original (un-published) research contributions based on the above mentioned theme including following topics **but not limited to:**

Software Computing

Software Engineering

Software and Embedded Systems

Applications of computing in Control Systems

Applications of computing in real time applications

Applications of computing in manufacturing applications
