About the FDP-Deep Learning Foundations: From Neural Networks to Explainable AI

The Faculty Development Program (FDP) on “Deep
Learning Foundations: From Neural Networks to
Explainable AI” is designed to equip educators and
researchers with essential knowledge and practical
skills in modern technologies.

This FDP provides a comprehensive introduction
to Neural Networks, covering key architectures
such as CNNs, RNNs, transformers etc, along
with optimization techniques. Participants will
also gain hands-on experience with industry-
relevant tools like TensorFlow and PyTorch for
building and fine-tuning deep learning models.

A key highlight of the program is its focus on
Generative AI, demonstrating how deep learning
models are used to create human-like text,
images, and intelligent systems. It also focuses
on Explainable AI, enabling participants to
interpret and trust AI model decisions using
techniques such as SHAP and LIME. The FDP
emphasizes bridging the gap between theory and
practice. By the end of the program, participants
will be able to design, implement, and evaluate
deep learning models.

TOPICS

- Day 1: Foundations of AI & Deep Learning
- Day 2: Deep Learning Architectures
- Day 3: Generative AI
- Day 4: Explainable AI (XAI)
- Day 5: Applications in real world scenarios
