

## DESIGN FOR ADDITIVE MANUFACTURING

|                                       |             |                                |           |                      |                               |
|---------------------------------------|-------------|--------------------------------|-----------|----------------------|-------------------------------|
| <b>CourseCode</b>                     |             | <b>Year</b>                    |           | <b>Semester</b>      |                               |
| <b>Course Category</b>                | Minor in DM | <b>Branch</b>                  | ME        | <b>Course Type</b>   | Theory                        |
| <b>Credits</b>                        | 4           | <b>L – T – P</b>               | 3 – 1 – 0 | <b>Prerequisites</b> | Basic Manufacturing Processes |
| <b>Continuous Internal Evaluation</b> | 30          | <b>Semester End Evaluation</b> | 70        | <b>Total Marks</b>   | 100                           |

**Course Outcomes:** Upon successful completion of the course, the student will be able to

|            | <b>Statement</b>   | <b>Skill</b>             | <b>BTL</b> | <b>Units</b> |
|------------|--|--------------------------|------------|--------------|
| <b>CO1</b> | Illustrate the need of design for additive manufacturing and represent synthetic curves and surfaces using mathematical models | Understand Communication | L2         | 1            |
| <b>CO2</b> | Apply design for additive manufacturing guidelines in designing of mass customized products                                    | Apply, Communication     | L2         | 2,3          |
| <b>CO3</b> | Discuss design for minimal material, functionality lattice structures using topology optimization                              | Apply, Communication     | L2         | 4            |
| <b>CO4</b> | Identify methods of powder handling and standards related to Additive Manufacturing  | Apply, Communication     | L2         | 5            |

**Contribution of Course Outcomes towards achievement of Program Outcomes & Strength of correlations (3:High, 2: Medium, 1:Low)**

|            | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|------|
| <b>CO1</b> | 3   |     | 1   |     |     |     |     |     |     |      |      | 2    |      |      |
| <b>CO2</b> | 3   |     | 1   |     |     |     |     |     |     |      |      | 2    |      |      |
| <b>CO3</b> | 3   |     | 1   |     |     |     |     |     |     |      |      | 2    |      |      |
| <b>CO4</b> | 3   |     | 1   |     |     |     |     |     |     |      |      | 2    |      |      |

**Syllabus**

| <b>UNIT</b> | <b>Contents</b>  | <b>Mapped COs</b> |
|-------------|--|-------------------|
| <b>I</b>    | <b>Introduction to Design for Additive Manufacturing (DfAM):</b> Introduction to geometric modelling, Modelling of Synthetic curves like Hermite, Bezier and B-spline, Parametric Representation of freeform surfaces, Design freedom with AM, Need for Design for Additive Manufacturing (DfAM), CAD tools vs. DfAM tools, Requirements of DfAM methods, General Guidelines for DfAM, The Economics of Additive Manufacturing, Design to Minimize Print Time, Design to Minimize Post-processing. | <b>CO1</b>        |
| <b>II</b>   | <b>Design Guidelines for Part Consolidation:</b> Design for Function, Material Considerations, Number of Fasteners, Knowledge of Conventional DFM/DFA, Assembly Considerations, Moving Parts, Part redesign, Opportunities for part consolidation, challenges with part consolidation.   | <b>CO2</b>        |
| <b>III</b>  | <b>Design for Improved Functionality:</b> Multi scale design for Additive  | <b>CO3</b>        |

|           |  |                 |
|-----------|--|-----------------|
|           | manufacturing, Mass customization, Biomimetics, Generative design, Design of multi-materials and functionally graded materials   |                 |
| <b>IV</b> | <b>Design for Minimal Material Usage:</b> Topology Optimization, Modelling of Design space, defining design and manufacturing constraints, performing analysis for weight reduction, maximize stiffness, minimize displacement, Post-processing and Interpreting Results, Applications of Topology Optimization, Topology Optimization Tools, Design of cellular and lattice structures, Design of support structures. | <b>CO 3</b>     |
| <b>V</b>  | <b>Other AM Considerations:</b> Designer Machine Operator Cooperation, Health and Safety, Material Exposure, Gas Monitoring, Gas Exhaust, Material Handling, Risk of Explosion, AM Part Standardization and Certification.   | <b>CO1, CO4</b> |

### Learning Resources

#### Text books

- 1.A Practical Guide to Design for Additive Manufacturing, Diegel, Olaf, Axel Nordin, and Damien Motte, Springer, 2020.
- 2.The 3D Printing Handbook: Technologies, Design and Applications, Redwood, Ben, Filemon Schoffer, and Brian Garret, 3D Hubs, 2017.

#### Reference books

- 1.Design for Advanced Manufacturing: Technologies and Process, Laroux K, Gillespie, McGrawHill, 2017.
- 2.Additive Manufacturing Technologies, Gibson, Ian, David W. Rosen, Brent Stucker, and Mahyar Khorasani, Springer, 2021.
