

PRASAD V. POTLURI SIDDHARTHA INSTITUTE OF TECHNOLOGY

(Autonomous)

Kanuru, Vijayawada-520007

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING (DATA SCIENCE)

III B Tech – I Semester

Computer Networks

Course Code	23DS3502	Year	III	Semester	I
Course Category	PCC	Branch	CSE (Data Science)	Course Type	Theory
Credits	3	L – T – P	3 – 0 - 0	Prerequisites	Data structures and Digital Logic & Computer Organization
Continuous Evaluation:	30	Semester End Evaluation:	70	Total Marks:	100

Course Outcomes

Upon successful completion of the course, the student will be able to:

		Level
CO1	Describe the foundational concepts of computer networks such as network types, topologies, reference models, and transmission media to develop a conceptual understanding for analyzing and designing basic network architectures.	L2
CO2	Apply data link layer and media access control (MAC) sublayer mechanisms, including their protocols, to determine suitable techniques for efficient and reliable data transmission.	L3
CO3	Use network layer concepts, including routing algorithms, IP addressing schemes, congestion control techniques, and protocol mechanisms, to develop efficient network communication strategies.	L3
CO4	Analyze the functionalities of transport and application layer protocols, including TCP, UDP, DNS, HTTP, and email systems, to assess their role in achieving secure, reliable, and efficient end-to-end communication.	L4

Contribution of Course Outcomes towards achievement of Program Outcomes & Strength of correlations (**3: Substantial, 2: Moderate, 1: Slight**)

[illegible]

PRASAD V. POTLURI SIDDHARTHA INSTITUTE OF TECHNOLOGY

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING (DATA SCIENCE)

III B Tech – I Semester

Syllabus		
Unit No.	CONTENTS	Mapped CO
I	Introduction: Network Types, LAN, MAN, WAN, Network Topologies Reference models- The OSI Reference Model- the TCP/IP Reference Model - A Comparison of the OSI and TCP/IP Reference Models, OSI Vs TCP/IP. Physical Layer –Introduction to Guided Media- Twisted-pair cable, Coaxial cable and Fiber optic cable and introduction about unguided media.	CO1
II	Data link layer: Design issues, Framing: fixed size framing, variable size framing, flow control, error control, error detection codes, CRC, services provided to Network Layer, Elementary Data Link Layer protocols: simplex protocol, Simplex stop and wait, Simplex protocol for Noisy Channel. Sliding window protocol: One bit, Go back N, Selective repeat-Stop and wait protocol.	CO1, CO2
III	Media Access Control: Random Access: ALOHA, Carrier sense multiple access (CSMA), CSMA with Collision Detection, CSMA with Collision Avoidance, Controlled Access: Reservation, Polling, Token Passing, Channelization: frequency division multiple Access (FDMA), time division multiple access (TDMA), code division multiple access (CDMA)	CO1, CO2
IV	The Network Layer Design Issues – Store and Forward Packet Switching- Services Provided to the Transport layer- Implementation of Connectionless Service-Implementation of Connection Oriented Service- Comparison of Virtual Circuit and Datagram Networks, Routing Algorithms-The Optimality principle-shortest path, Flooding, Distance vector, Link state, Hierarchical, Congestion Control algorithms- General principles of congestion control, Congestion prevention policies, Fragmentation, network layer in the internet – IP protocols-IP Version 4 protocol-IPV4 Header Format, IP addresses, Class full Addressing, CIDR, Subnets-IP Version 6-The main IPV6 header, Transition from IPV4 to IPV6, Comparison of IPV4 & IPV6.	CO1, CO3
V	The Transport Layer: Transport layer protocols: Introduction-services- port number-User data gram protocol-User datagram-UDP services-UDP applications-Transmission control protocol: TCP services- TCP features-Segment- A TCP connection- windows in TCP- flow control-Error control, Congestion control in TCP. Application Layer – World Wide Web: HTTP, Electronic Mail-Architecture- web based mail- email security- TELENET-local versus remote Logging-Domain Name System.	CO1, CO4

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING (DATA SCIENCE)**III B Tech – I Semester****Learning Resources****Text Books**

1. Computer Networks, Andrew S. Tanenbaum and David J. Wetherall, 5th Edition, 2011, Pearson Education.
2. Data Communications and Networking, Behrouz A. Forouzan, 5th Edition, 2013, Tata McGraw-Hill Education.

References

1. Data and Computer Communications, William Stallings, 10th Edition, 2013, Pearson Education.
2. TCP/IP Protocol Suite, Behrouz A. Forouzan, 4th Edition, 2009, McGraw-Hill Education.
3. Computer Networks - A Systems Approach, Larry L. Peterson, Bruce S. Davie, Fifth Edition, 2018, Morgan Kaufmann.
